

S

wifts have over 75 different species that can be found all over the world and some are getting endangered right now.

W

With a wingspan of 38-40^{cm}, the swift

is one of the most fastest birds in the world

I

t eats spiders, flies, mosquitoes and beetles.

F

Female swifts lay 4 to 6 white eggs and only 2 to 3 hatch after 19-23 days of staying warm, in other words "incubation".

T

he swifts life is in the air, for it eats, sleeps, drinks, and mates in the sky above us. It will only go down to produce offspring.

S

wifts can live up to 5 years and 5 months in the wild.

! WHY ARE SWIFTS AMAZING!
